

SMART 3D

STEREO SOUNDS FROM THE CASE

Components are similar to those depicted

AROUSE CURIOSITY AND EXCITEMENT

Through the stereoscopic representation of your data, **Smart 3D** creates lasting impressions in your sales presentations and internal meetings. Three-dimensional images create profound visual impressions with the viewers. Another essential advantage is an increased concentration upon the subject of the presentation. That is why the ideas you present using **Smart 3D** will be most vividly remembered by the viewers.

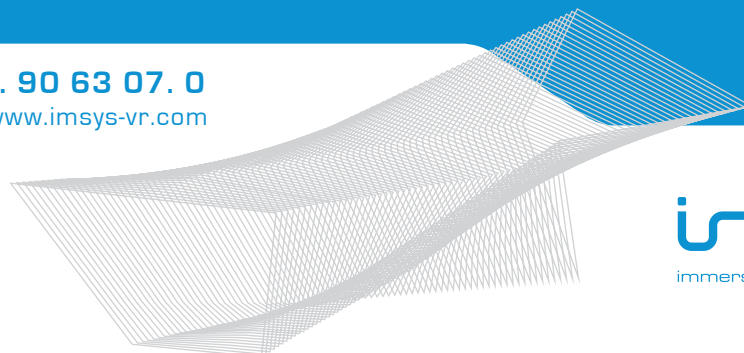

Smart 3D also offers great advantages with regard to technical applications such as design and engineering. Structures, dimensions as well as functions can be easily perceived and comprehended by the viewers. Like this different departments can be co-ordinated most effectively. Decisions can be taken much more quickly.

Smart 3D combines all the components you need for a professional stereo projection. All of these components come in just one case including **Projectionsdesign's** handy Active-Stereo-Projector: **AS3D**. The USPs are clearly the outstanding design and a high level of mobility. Both stereo as well as mono contents can be easily integrated in your presentations by simply switching from one to the other.

SMART 3D INCLUDES:

- **AS3D**
Active-Stereo-Projektor
- **Highend-Notebook**
- **Five pairs of stereo glasses** including emitter
- **SpaceNavigator for 3D interaction**
- **MATROX TripleHead2Go**
- **Cable set**
- **Stereoscopic player 1.4.2**
- **Case**
